### Amazing customer service!

From pre-sales to receiving our charger, Callum and the Hypervolt sales team were so helpful. I couldn't believe I had an email response late from them on a Saturday eve! Callum went above and beyond to make sure I had the charger available so quickly and in time for our electrician to install. The product looks great, the app easy to use. I would definitely recommend Hypervolt +++++

- Darren Best

### The Best!

I have had hypervolt for near two years. In that time it has never not charged my car or let me down it is very reliable even in heavy Scottish snow.

The hypervolt staff are the best you will get. Friendly professional and knowledgeable. Not only that but even weekends or out hours there is always someone to help.

I am proud to have a hypervolt.

- Neil

### Excellent!

Enquiry quickly dealt with and I was referred to Missenden Electrical to install. The whole experience was very positive. They came round to do a site visit to survey as it wasn't a standard installation and discussed the different alternatives. On the installation day, they arrived when expected and were friendly, helpful, tidy and explained how it all worked at the end. Would highly recommend Hypervolt and certainly use them again.

- Karrie

### Excellent Hypervolt 3.0 charger and install!

Hypervolt 3.0 fitted by approved installer. Really pleased with charger, integrates perfectly with solar and battery installation. Installation was smooth and all my queries answered. App is intuitive and I found it easy to use. Pre sales query answered knowledgably and promptly. Have no hesitation in recommending charger.

- Dave Bevan
